Computer Science student at Universitas Padjadjaran with a strong enthusiasm for learning and exploring new technologies. Interested in Web Development, Data Science and Machine Learning. Actively involved in organizational activities and collaborative project teams, with strong adaptability and teamwork skills.

EDUCATION

Bachelor of Computer Science

Universitas Padjadjaran

Cumulative GPA: 3.92/4.0

Relevant coursework: Data Structures & Algorithms, Web Programming, Artificial Intelligence, etc.

Sumedang, Indonesia

Aug 2023 – Present

EXPERIENCES

TEDxPadjadjaran University

Frontend Developer

Sumedang, Indonesia

Apr 2026 – Present

- Developed website interfaces based on UI/UX designs to ensure a responsive and user-friendly experience.
- Integrated frontend features with backend services, including user authentication and ticket form submission functionality.
- Implemented animations using GSAP to create a more engaging and interactive website experience.

Pusat Inovasi Pengajaran dan Pembelajaran (PIPP) Unpad

Machine Learning Engineer Intern

Sumedang, Indonesia

Aug 2025 – Dec 2025

- Developed survey methodologies for Electroencephalography (EEG) data collection to improve learning video quality.
- Built a web-based survey data collection platform integrated with the Muse S Athena EEG Headband.
- Collected and processed survey data from 8 respondents for machine learning analysis.
- Evaluated and compared 6 machine learning models (SVM, Random Forest, XGBoost, LightGBM, EEGNet (PyTorch), and hybrid Autoencoder + XGBoost) based on performance metrics to select the most efficient model.

Department of Computer Science FMIPA Unpad

Laboratory Teaching Assistant

Sumedang, Indonesia

Feb 2025 – Dec 2025

- Delivered weekly lab sessions for over 80 undergraduate students across three courses: Object-Oriented Programming, Web Programming, and Computer Organization & Architecture.
- Evaluated and gave feedback on 10+ assignments throughout the semester, resulting in 92% passing rate.
- Mentored students through 10+ final group projects, guiding the implementation of OOP principles, full-stack web application development, and basic assembly programming.

LEADERSHIP & ORGANIZATIONS

Informatics Festival 2025

Manager of IT Competition

Sumedang, Indonesia

Jun 2025 – Oct 2025

- Concepted 4 competitions including Competitive Programming, Data Analysis Competition, Essay Competition, and Hackathon.
- Managed 400+ participants across competition from 40+ universities and high schools nationwide.
- Led execution of Hackathon Day attended by 15 Hackathon finalist teams, ensuring smooth technical and operational delivery.

Himatif FMIPA Unpad

Staff of IT Development Department

Sumedang, Indonesia

Feb 2024 – Dec 2025

- Facilitating training sessions and IT-related competition preparation for 100+ participants.
- Designed a structured 6-session mentoring syllabus for mentors across three competition tracks, outlining learning objectives, materials, and preparation strategies.
- Contributed to the success of teams advancing to national and international competition finals, with three teams qualifying as finalists.

PROJECTS

CareConnect: Violence Reporting & Consultation Platform

Mar 2026 – Jun 2026

- Implemented a full authentication system using Better Auth, handling user sessions, role-based access, and secure credential management.
 - Integrated Midtrans payment gateway to enable a donation feature, including payment flow setup, webhook handling, and transaction status management.
 - Configured and managed the application database on Supabase (PostgreSQL), including schema design and backend integration.
 - Built an AI-powered topic association model using the Apriori algorithm to analyze violence report content, surfacing co-occurring patterns to support data-driven case insights.
- Skills: Next.js, Better Auth, Midtrans, Supabase, Machine Learning

Neuro AI: Multimodal Student Engagement Analytics System

Aug – Dec 2025

- Built an end-to-end EEG signal processing pipeline using MNE-Python integrated with MuseLSL for real-time data acquisition from Muse S Athena headband at 256Hz.
 - Benchmarked 6 ML/DL models (SVM, Random Forest, XGBoost, LightGBM, EEGNet (PyTorch), and hybrid Autoencoder + XGBoost) under LOVO and LOSO cross-validation across 8 respondents, achieving 48-51% accuracy in cognitive engagement classification.
 - Developed a Next.js + Flask web platform for synchronized EEG data collection and survey administration, enabling real-time marker synchronization between video stimuli and neural signal acquisition.
- Skills: Python, MNE-Python, PyTorch, Scikit-learn, XGBoost, Flask, Next.js, MuseLSL

Robot Angklung: Hand Sign-Controlled Robot

Oct 2025 – Dec 2025

- Developed a hand gesture-controlled robotic system capable of playing Angklung instruments using camera-based motion detection.
 - Implemented real-time computer vision with Python (MediaPipe) and integrated Arduino (C++) for precise actuator control.
 - Showcased an integrated system combining AI-driven vision, embedded hardware, and musical robotics.
- Skills: C++, Computer Vision, Embedded Systems, Arduino

Rodaza Coffee: Coffee Shop Order Management

Aug 2024 – Dec 2024

- Developed a role-based coffee ordering website using CodeIgniter 4, supporting both admin and customer functionalities.
 - Implemented online ordering including Dine-In and Delivery order option, and payment features using Midtrans.
 - Built an admin dashboard for real-time order management and sales reporting to improve operational efficiency.
 - Designed a responsive and user-friendly interface to enhance customer experience and streamline the ordering process.
- Skills: CodeIgniter4, PHP, Midtrans

And 5+ more projects covering IOT, AI, Machine Learning & Computer Vision, Web Development, etc.

SKILLS

Programming Language & Framework: Python, C++, C#, Java, JavaScript, TypeScript, PHP, React, Next.js, Tailwind CSS, Laravel, CodeIgniter4, Flask, FastAPI, PostgreSQL, MySQL, Prisma ORM.

Data Science & Machine Learning: Data Cleaning & Preprocessing, Exploratory Data Analysis, Data Visualization, Machine Learning/Deep Learning Tools (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch, TensorFlow, MNE-Python, MuseLSL)

Other Programming Tools: Version Control System (Git, GitHub), Jupyter Notebook, Google Colab, Hugging Face.

LANGUAGES

Bahasa Indonesia (Native), English (Intermediate)
